Re: Ballock v. Costlow et al  
Civil action 1:17-CV-52

Dear sirs,

At the request of my son, Scott Ballock, I have downloaded the Forensicon extraction of Kenny Ice's iPhone in .pdf format to allow viewing the download without using the UFED Reader previously provided earlier. The enclosed thumb drive contains the download in .pdf format.

To view the files, invoke the file named  
"Apple\_iPhone 5\_2018-06-20\_Report.pdf"  
That will open an .pdf document which displays the dump.  
Some contents, such as videos and pictures, can be accessed by clicking on the hyperlink contained in the .pdf file.

**PLEASE NOTE:** If you wish to view files using the previously-provided UFED Reader file , you may still do so. ***However, that reader ("UFED Reader3.7.exe") should not be used to print files*** because it may fail to print certain entriels (those marked as "deleted" when viewed with the UFED Reader). If you wish to print UFED Reader files (including those marked as "deleted"), you'll have to use an upgraded version of the reader provided by Forensicon. I have included a file for the updated UFED Reader on the thumb drive, and its filename is "UFEDReader\_7.6.0.83.exe".

The reader ver. 7.6 is *very* slow to open, then slowly to load files from "KENNY ICE IPHONE 5.ufdr" (sent on previous thumb drive). If you get an error message "...missing [filename].dll, ignore it—just close the popup. When it starts, click on "Activate later".

Regards,

A handwritten signature in black ink that reads "Thomas Ballock". The signature is written in a cursive style with a large initial 'T'.
